

SOFTENG 351: Assignment #3

May 19, 2020

Aiden Burgess

abur970 - 600280511

1**a)**

$$bfr = \lfloor \frac{512}{115} \rfloor = 4$$

$$\#Blocks = \lceil \frac{30000}{4} \rceil = 7500 \text{ blocks}$$

b)**i.**

$$Size = 4 + 8 = 12 \text{ bytes}$$

ii.

$$bfr_{idx} = \lfloor \frac{512}{12} \rfloor = 42$$

iii.

$$\#IdxEntries = 7500 - \text{same as number of blocks}$$

$$b_{idx} = \lceil \frac{7500}{42} \rceil = 179 \text{ blocks}$$

2**a)****i.**

$$\#LeafBlocks = \lceil \frac{1,000,000}{10} \rceil = 100,000 \text{ blocks}$$

$$\#Lvl_1_Blocks = \lceil \frac{100,000}{100} \rceil = 1,000$$

$$\#Lvl_2_Blocks = \lceil \frac{1,000}{100} \rceil = 10$$

$$\#Lvl_3_Blocks = \lceil \frac{10}{100} \rceil = 1$$

$$Total_Blocks = 100,000 + 1,000 + 10 + 1 = 101,011 \text{ blocks}$$

ii.

$$\#I/O = h = 4$$

b)

i.

$$\#LeafBlocks = \lceil \frac{1,000,000}{10} \rceil = 100,000 \text{ blocks}$$

$$\#Lvl_1_Blocks = \lceil \frac{1,000,000}{100} \rceil = 10,000 - \text{as it is dense}$$

$$\#Lvl_2_Blocks = \lceil \frac{10,000}{100} \rceil = 100$$

$$\#Lvl_3_Blocks = \lceil \frac{100}{100} \rceil = 1$$

$$Total_Blocks = 100,000 + 10,000 + 100 + 1 = 110,101 \text{ blocks}$$

ii.

$$\#I/O = h = 4$$

c)

i.

$$\#LeafBlocks = \lceil \frac{1,000,000}{7} \rceil = 142,858 \text{ blocks}$$

$$\#Lvl_1_Blocks = \lceil \frac{142,858}{70} \rceil = 2041$$

$$\#Lvl_2_Blocks = \lceil \frac{2,041}{70} \rceil = 30$$

$$\#Lvl_3_Blocks = \lceil \frac{30}{70} \rceil = 1$$

$$Total_Blocks = 142,858 + 2,041 + 30 + 1 = 144,930 \text{ blocks}$$

ii.

$$\#I/O = h = 4$$
